HOW TO USE THIS DOCUMENT

This document can be used by families, professionals and community members to help understand what intelligence is and how it can be reported.

ABOUT CAPTURING INTELLIGENCE

Intelligence is collected information that is used to build a picture of current trends or patterns, in order to assist the police to prevent, investigate and disrupt crime.

Intelligence collection is a continuous process, and any intelligence shared will be risk assessed by the police. There may be local requirements for its recording and use. Information disclosed might not be directly related to the safeguarding of the child or young person disclosing it. However, this intelligence may lead to the safeguarding of many others, so should be treated in the same way.

At The Children's Society, we generate intelligence through our services, such as missing from home and care services, advocacy services, drug and alcohol services, child sexual exploitation services, trafficking services, and refugee and migrant services.

Intelligence can be captured in any situations where children and young people are present.

GUIDANCE FOR CAPTURING INTELLIGENCE

The following chart outlines some examples of intelligence that may arise when speaking to children and young people.

Details to consider are: who, what, when, where and how?

The frequency of such occurrences must also be considered. Has the child or young person mentioned it once, or do the same names or details keep arising?

TRAVEL	Methods, timings, times and routes of travel, ie bus route/oyster card details/ vehicle number plates.

Where possible and safe to do so, let the child or young person know you are sharing the information and ask for their consent to do so. Even where you do not have consent to share confidential information, you may lawfully share it if this can be justified in the public interest.

GUIDANCE FOR LOCAL REPORTING
